

Our application keeps you informed with instant notifications whenever activity is detected in your home. Whether it's motion at the front door, a window opening, or a sudden change in temperature, you'll receive immediate alerts on your tablet, allowing you to take action promptly.

Motion sensor detects movement -> LED turns on (people step in the living room, turn on light)

Light sensor detects low light-> LED turns on (detects night coming, turn on the light)

Temperature sensor detects high temperature-> buzzer sounds an alert (pot temperature too high, sound alert)
